Subject PURCHASE ORDER 7361 (ATTACHED) - RAILROAD TIES

COPIES TO:

P. Fulkerson
Fila.

Jerry, we recently experienced a derailment of one of our chemical railroad cars on a radius curve on the track leading to the Filtration Plant (next to the old Fourth site).

Inspection revealed that the ties under the rails at this point were rotted outwe temporarily alleviated the problem through insulation of tie-bars, but the situation was of an emergency nature, and required immediate action to replace railroad ties at this particular point, along with some ballast.

Mr. Fulkerson and I walked the track recently, and 1976 will see some investment in a complete rebuilding of certain portions of our service track, hopefully with some rerouting of the radius curves to permit more ease in negotiating these curves with larger volume railroad cars which have been put in service as an economic move by the railroads.
